SILFAB HIGH HEAT SILICONE DUCTING

Flexfab[®]
Engineering trust. Around the world.™

Highly flexible & non-kinking

THE ULTIMATE EXTREME TEMPERATURE DUCTING HOSE

This is without doubt the finest engineered extreme temperature ducting product available. Used extensively in the Motorsport Industry

- Recommended for low pressure handling of high and low temperature air, dust or fumes.
- Extremely lightweight product, non-kinking, easy installation
- Flexible, chemically treated, helically wound, bronze plated, spring steel wire reinforcement
- Silicone-coated woven, fiberglass, fabric covering with continuous filament fiberglass cord between coils.
- Not recommended for handling liquids or abrasive materials.
- Heat-vulcanized for maximum rubber-to-wire bond.
- Resistance to Oils and Solvents – fair, Ozone And Fungus – excellent, Alkalis and Water - good.
- Meets commercial low temperature flexibility. Odour free in hot air service.
Temperature range -65°F to +450°F (-54°C to +232°C).

CURRENTLY AVAILABLE IN 12 FEET LENGTHS. WE ARE ALSO ABLE TO CUSTOM-MAKE SILICONE DUCTING WITH DIFFERENT SIZED CUFFS AS PER REQUIREMENT
