

Product Notification

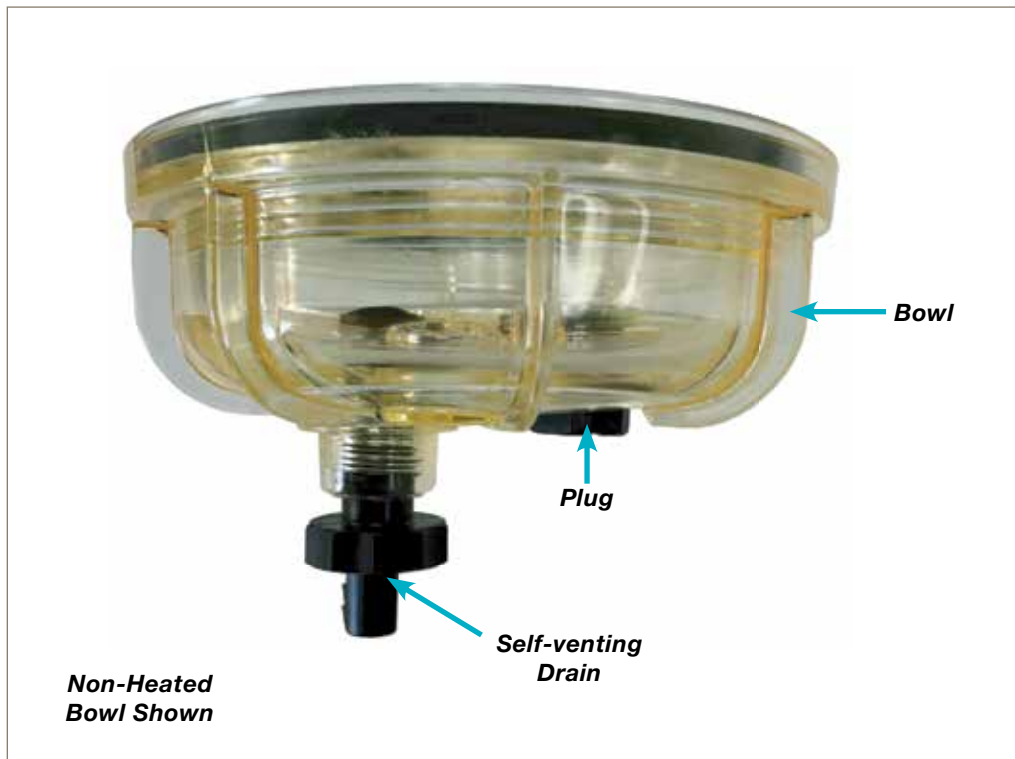

300/400/600/700 Series Bowl Consolidation

Effective March 2018, all 300, 400, 600 and 700 Series contaminant collection bowl part numbers will be consolidated to two groups, heated and non-heated.

See charts on next page for affected part numbers.

- All bowls will include our self-venting drain knob which does not completely thread-out from the bowl.
- Plug/WIF port threads will be standardized from 9/16"-18 UNF-2B to 1/2"-20 UNF-2B.
- Any bowls that are short-cored (blocked-off, not available for use) and do not have ports for water-in-fuel (WIF) sensors or plugs will be discontinued and replaced by bowls with WIF ports. All bowls will now include either a WIF sensor or a plug in the WIF port.
