

# PROTECT YOUR EQUIPMENT & YOUR LIFE WITH DONALDSON FIRE SAFETY FILTERS

Complies with Safety Standard U.L. 558\*

Donaldson Australasia is proud to announce the release of our 'Fire Retardant' filter range.

When safety and performance is critical, it's wise to invest in products that are renowned for quality and reliability and a company defined by technological innovation and service.

Donaldson Australasia comprises of a company with over 9000 employees and 34 manufacturing facilities worldwide. With over 450 patents, Donaldson is a global market leader committed to technology and satisfying the total filtration needs of the customer.

Filter media is designed to meet the flame retardance requirements of U.L. 558\* when tested by Underwriters Laboratories.

**\*U.L.558 – STANDARD FOR SAFETY FOR INDUSTRIAL TRUCKS, INTERNAL COMBUSTION ENGINE-POWERED**

These requirements cover the fire safety aspects of industrial trucks with internal combustion engines such as tractors, platform-lift trucks, fork-lift trucks, and other specialised vehicles for industrial use. These requirements do not cover other possible safety aspects of such equipment.

## Part Number

## Description

P902260	Air Safety Filter
P902262	Air Primary Filter
P902264	Air Primary Filter
P902266	Air Primary Filter
P902268	Air Primary Filter
P902270	RadialSeal Primary Filter
P902272	Air Primary Filter
P902274	Air Primary Filter

Engineering standards and material specifications are available upon request. Contact Donaldson today and we will have our area manager or local stockist contact you with the fire retardant filter range that suits your application.
