

Two Stage Air Cleaners with Primary Element only. Suitable for Vertical or Horizontal Mounting

The Cyclopac® retains all the efficiency of paper filtration and greatly reduces the frequency of service of the paper filter. Through centrifugal pre-cleaning in the primary stage, the service life of the filter is many times longer than a system employing a paper filter only.

Dust removed by the centrifugal cleaning is carried into the dust cup which is easily and quickly removed and dumped. Under ordinary dust conditions, dust cup service is required only infrequently.

FWG Suitable for Vertical or Horizontal Mounting
