

Gates Heat Shield

It can take the heat!

HeatGuard™ is a protective sheathing.

Constructed of tightly woven fibreglass on the inside.

The cover is a specially compounded heat-resistant silicone rubber.

HeatGuard™ is completely non-asbestos, heat resistant sleeving.

Its silicone cover can also withstand a broad range of solvents and fuels.

It goes over most hoses and couplings, with only hose clamps or wire ties.

Applications:

- Welding areas
- Engine compartments
- Steel Mills
- Oil Rigs
- Hot Asphalt Construction
- Refineries
- Automotive

HeatGuard™ Protective Sheathing
