

# Locomotive Ducting, Hoses, and Bellows

## High Pressure Coolant Hose Assemblies

- FKM or silicone liners with fabric reinforcement
- Operating pressure -10 PSI to 75 PSI
- Any diameter and length configuration
- Bonded, clamped, or crimped metal fittings

## High Pressure Turbo Bellow Assemblies

- Ideal for high air pressure applications
- Operating pressure -15 PSI to 75 PSI
- Any diameter and length configuration
- Bonded, clamped, or crimped fittings
- Custom design for individual offset and extension requirements

## Traction Motor Ducts

- Silicone with fabric reinforcement
- Capable of withstanding harsh exterior environments on underside of rolling stock
- Any diameter and length configuration
- Custom design for individual offset and extension requirements
