Innovative HVAC Ducting Solutions for the Global Passenger Railcar Industry

- Global supplier of lightweight flexible and rigid materials for positive and negative low pressure HVAC ducting systems
- Specializing in lightweight HVAC transfer and sealing applications for various transportation markets
- Materials tested to various global flame, smoke, and toxicity requirements
- 50 + years supplying HVAC components and assemblies to the transportation industry
- Emphasizing weight reduction, elimination of insulation and sound attenuation materials, speed of assembly, and component reduction
- Cost competitive alternatives
